

Цветни светове

## Дизайн на чипове Triflex

**52 цвята.**

**Безброй възможности.**

Цветовете поставят акценти върху балкони, лоджии и аркади. Придават индивидуален облик и подчертават архитектурата на сградата. Цветовият спектър на дизайна на Triflex Chips ви предлага 52 различни цвята и три различни повърхности.

Решенията за уплътняване Triflex предпазват вашата строителна конструкция от проникваща влага и влага в дългосрочен план.

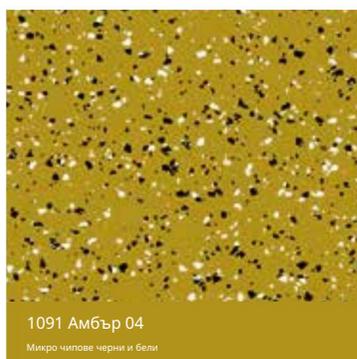

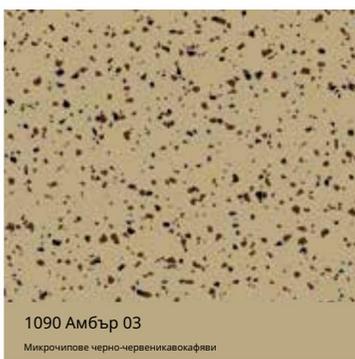

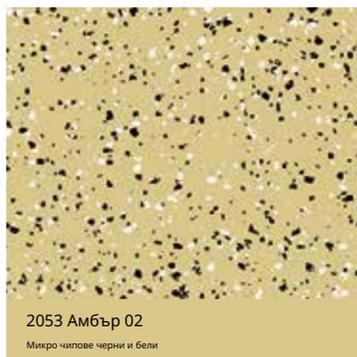

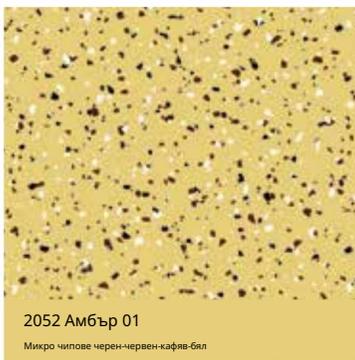

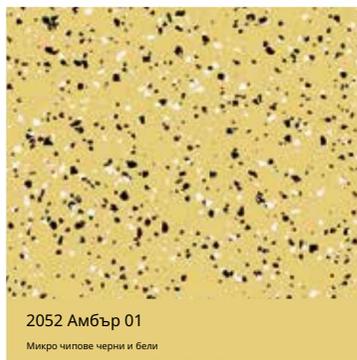

Независимо дали става въпрос за ремонт или ново строителство, ние имаме правилното решение, на което ще се радвате дълго време.

Вискоеластичният материал на нашите системи от течна пластмаса лесно се справя с механичните точкови натоварвания, причинени от столове или крака на маси.

# Повърхностни

## Поръсване с микрочипове

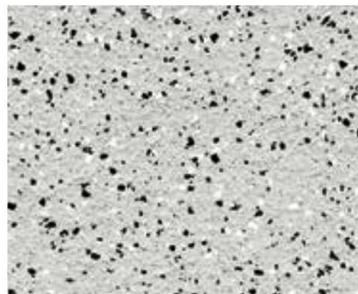

Triflex Micro Chips придават структура на повърхностите. Погледът е отпуснат.

7035 Кварц 01  
Микро чипове черни и бели

## Фино разпръскване

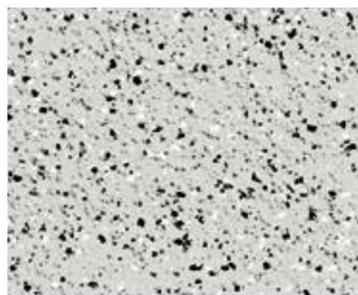

Допълнително поръсен изсушен на огън кварцов пясък има противоплъзгащ ефект.

Едър кварцов пясък - микро чипове черни и бели

### Много предимства с един поглед

- Възможен бърз ремонт само за един ден
- Ремонт обикновено без къртене, мръсотия и прах
- Решения, устойчиви на атмосферни влияния и UV лъчи
- Трайна защита на строителната конструкция от влага
- Уплътнение на цялата повърхност
- Високоеластичен материал предотвратява пукнатини
- Може да се обработва целогодишно (дори при ниски температури)
- Разнообразие от цветове и повърхности
- Сертифицирано и изпитано качество

Забележка: Незначителни цветови отклонения в този преглед на цветовете в сравнение с оригиналните цветове се дължат на печатна технология и материал.
